

SCOE Design Lab Focus on Vinyl Cutter

The vinyl cutter is an ideal digital manufacturing tool for schools of all grade levels due to its versatility, safety and ease of use. Vinyl cutters can be used to make custom interior or exterior banners and stickers, stencils for painting, silkscreening and etching glass or metal and, when combined with a heat press, custom t-shirts, cloth bags, etc. Experienced teachers from elementary, middle and high school will share projects and techniques, including fundraising opportunities.

Participants will leave with a custom t-shirt and detailed instruction on rendering text and images for cutting on the vinyl cutter and the techniques used to prepare and transfer the vinyl.

You must select CHECK or CREDIT CARD to complete this registration.
(Purchase orders are not accepted for this event.)

Check (paid by you or your district/school): After you register you will receive a confirmation / invoice. If you are paying for the event yourself, print your confirmation / invoice, attach your check, and mail as indicated. If your district/school is paying for the event, please forward your confirmation to the appropriate person so that a check can be processed.

Credit card (PayPal): You must enter credit card information at the time of registration. If you are being reimbursed for this event, follow your district/school guidelines for reimbursement.

If you do not receive a confirmation / invoice within 24 hours, your registration is not complete. Please call the registration contact listed below for assistance.
